

SHIVANSHU SRIVASTAVA

+91 9198865041 | shivanshu.srivastava.work@gmail.com | LinkedIn | GitHub | Portfolio

Summary

Full-stack developer specializing in AI-driven financial systems and quantitative tools. Proficient in Python (FastAPI), Next.js, and LLM orchestration (LangChain). Focused on building high-performance, automated intelligence platforms.

Education

Sandip University <i>B.Tech, Computer Science and Engineering</i>	2022 – Present
GlenHill School <i>SSC & HSC</i>	2018 – 2021

Technical Skills

- Languages: Python, SQL, TypeScript, JavaScript, HTML/CSS
- Frameworks & Concepts: FastAPI, Next.js 15, Flask, LangChain, REST API, Microservices, Agile
- Libraries: Pandas, NumPy, TA-Lib, Scikit-learn, Recharts, SQLAlchemy
- Tools & Infrastructure: Docker, CI/CD, Cloud, PostgreSQL, MongoDB, Vercel, GitHub Actions
- Core: Data Structures, Algorithms, Unit Testing, Debugging

Internships

Brain O Vision <i>Machine Learning Intern</i>	Jan 2024 – Mar 2024 <i>Hyderabad, India</i>
– Optimized ML models improving prediction accuracy by 15% and workflow efficiency by 20%. – Performed feature engineering and clustering for behavioral data analysis.	
Code Alpha <i>Python Programming Intern</i>	Nov 2023 – Dec 2023 <i>Lucknow, India</i>
– Developed Python automation scripts and clean-code software solutions, improving execution speed by 15%. – Strengthened core algorithm implementation and real-world dev workflows.	

Projects

TradeFlow: Trading Intelligence Terminal <i>Live Next.js 15, FastAPI, MongoDB</i>
– Institutional terminal with AI behavioral coaching and advanced trade logging. – Real-time analytics with P&L heatmaps and sector-wide exposure matrices.
NSE Quantitative Swing Screener <i>Live FastAPI, SQLite, TA-Lib</i>
– High-speed screener analyzing 2,600+ stocks in $\lt$ 60s with 90% faster caching. – Detects Minervini Stage 2 and VCP setups using RS percentile ranking.

Aeronexis AI Platform

Live | Next.js 15, Tailwind, Framer Motion

- High-performance, AI-native engineering design platform with seamless browser-based workflows.
- Built an optimized landing page and robust waitlist acquisition system using MongoDB.

DietGPT: AI Nutritionist & Coach

Live | LangChain, Groq, Firebase

- AI health platform with LLM-powered meal logging and macro estimation.
- Automated diet/workout generators tailored to user metrics and preferences.

NSE Momentum Breakout Monitor

Source | Python, Telegram API

- Automated breakout detection engine for Nifty 500 stocks with Telegram alerts.
- Integrated risk management with automated position sizing and stop-loss logic.

Organizational Memory: AI System

LangChain, ChromaDB, FastAPI

- RAG-based AI system for intelligent document retrieval and decision extraction.
- Vector search pipeline with metadata filtering for high-precision retrieval.

Clima-Cast: Climate Prediction

Source | Python, Neural Networks

- Developed an MLPRegressor neural network model to predict temperature and humidity from IoT sensor data.
- Engineered automated data pipelines for CSV loading, model training, and performance visualization.

Shooters of India: Analytics Platform

Live | JavaScript, SEO, Vercel

- SEO-optimized platform for shooting sports with integrated performance analytics.
- Improved asset delivery and built statistical tracking for athlete performance.

Sales Intelligence Model

Python, SQL, Excel

- End-to-end sales analysis identifying business trends and growth KPIs.
- Automated reporting workflows improving BI efficiency by 40%.

Hackathons

Data Science Hackathon

Oct 2023

AICTE

- Built regression models and performed feature engineering on 1000+ records.

HVAC Smart Control System

2024

SUNHACKS 2024

- Developed predictive model for HVAC energy optimization and climate control.
